

Diagram for lockscreen changes

Script		File system variable	Usage import JS to qml
node weather	-->	..\code\temp.js	Display current temperature and conditions
node forecast	-->	..\code\forecast.js	Display 5 day forecast
node stocks	-->	..\code\market.js	Display market indexes
python gmail	-->	..\code\gmail.js	Display unread gmail messages count

Notes: create your own theme, and copy breeze theme to that folder, then copy the modified qml files to your new theme folder
